

Set Up E-mail on an Android Phone

The following steps will teach you how to sync your 1&1 Mail Basic on an Android Phone.

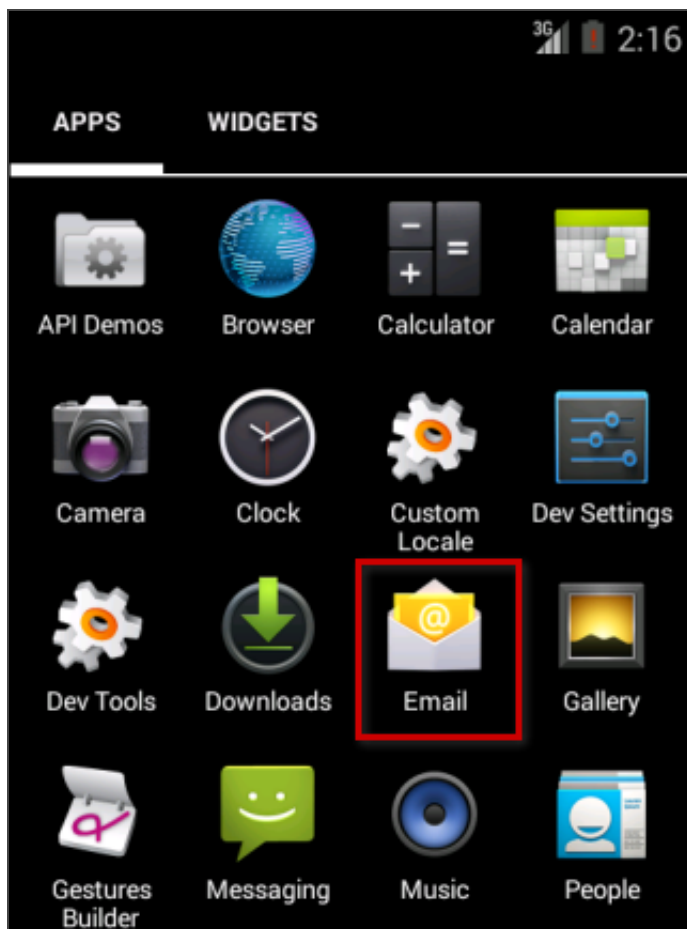

Follow the instructions below to sync your E-mail account on an Android Phone. Before you begin, you will need to have [created 1&1 Mail Basic account](#).

Please note:

1&1 suggests the use of [IMAP](#) over [POP3](#).

Step 1

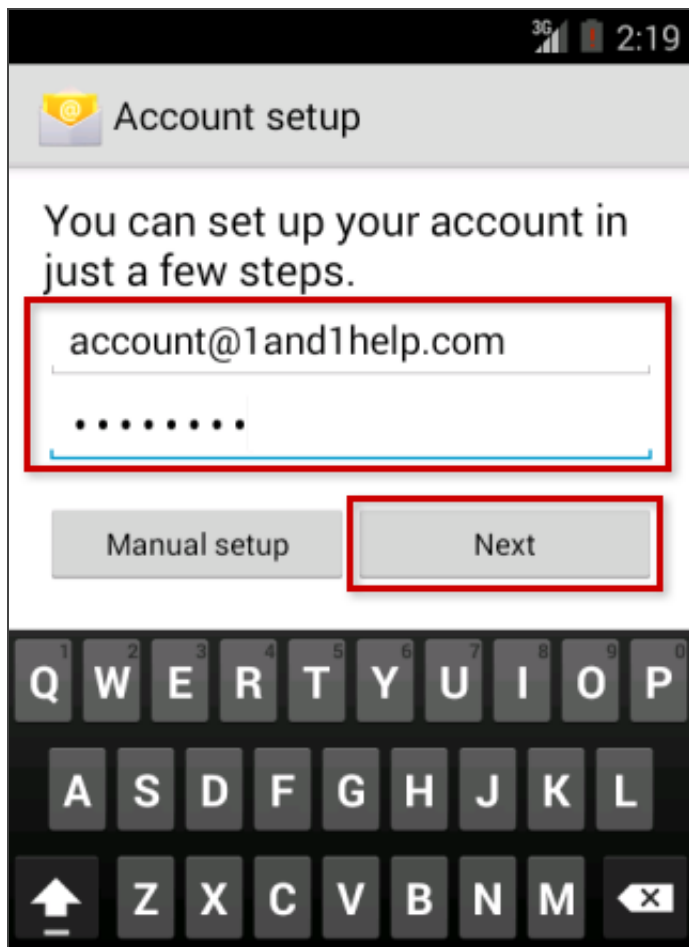

Under **APPS**, click on **E-mail**.

APPS overview

Step 2

Enter your **E-mail address** and **password** and then press **Next**.

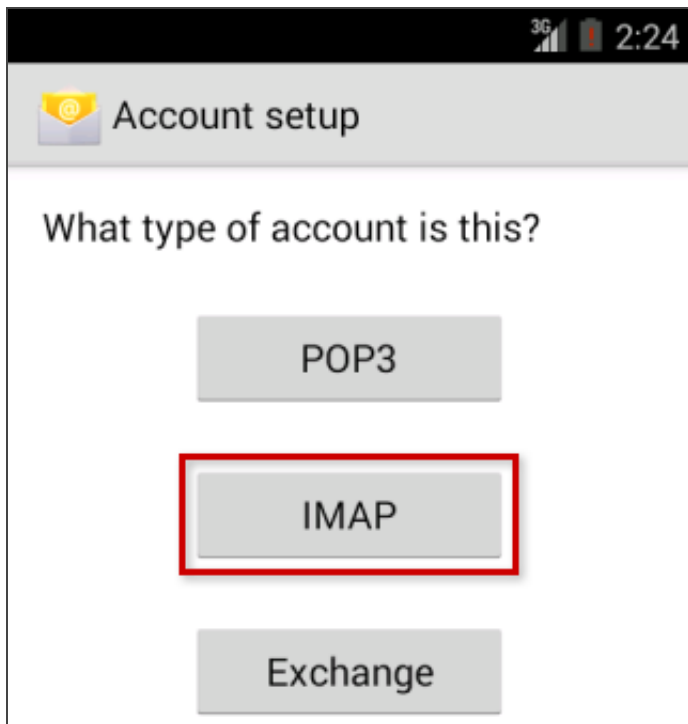

The screenshot shows the 'Account setup' screen on an Android device. At the top, the status bar displays '3G', signal strength, battery, and the time '2:19'. The app title 'Account setup' is in the top left. Below the title, the text reads 'You can set up your account in just a few steps.' There are two input fields: the first contains the email address 'account@1and1help.com' and the second contains seven dots representing a password. Below the input fields are two buttons: 'Manual setup' and 'Next'. A red box highlights the email and password fields, and another red box highlights the 'Next' button. A virtual keyboard is visible at the bottom of the screen.

Account setup

Step 3

Select **IMAP**.

Types of accounts

Step 4

Under **Server**, enter **imap.1and1.co.uk** and enter **993** in the **Port** text box. Choose **SSL/TLS** as the **Security type**. Click on **Next** when finished.

Account setup
