

## Set Up E-mail on an iPhone

*For iOS 9.1*

**Learn how to set up your 1&1 Mail Basic account on your iPhone, allowing you to send and receive e-mails wherever you go.**

The images used in this guide reflect the **iOS 9.1** operating system.

Before you begin, you will need to [Create 1&1 Mail Basic Account](#).

### **Step 1**

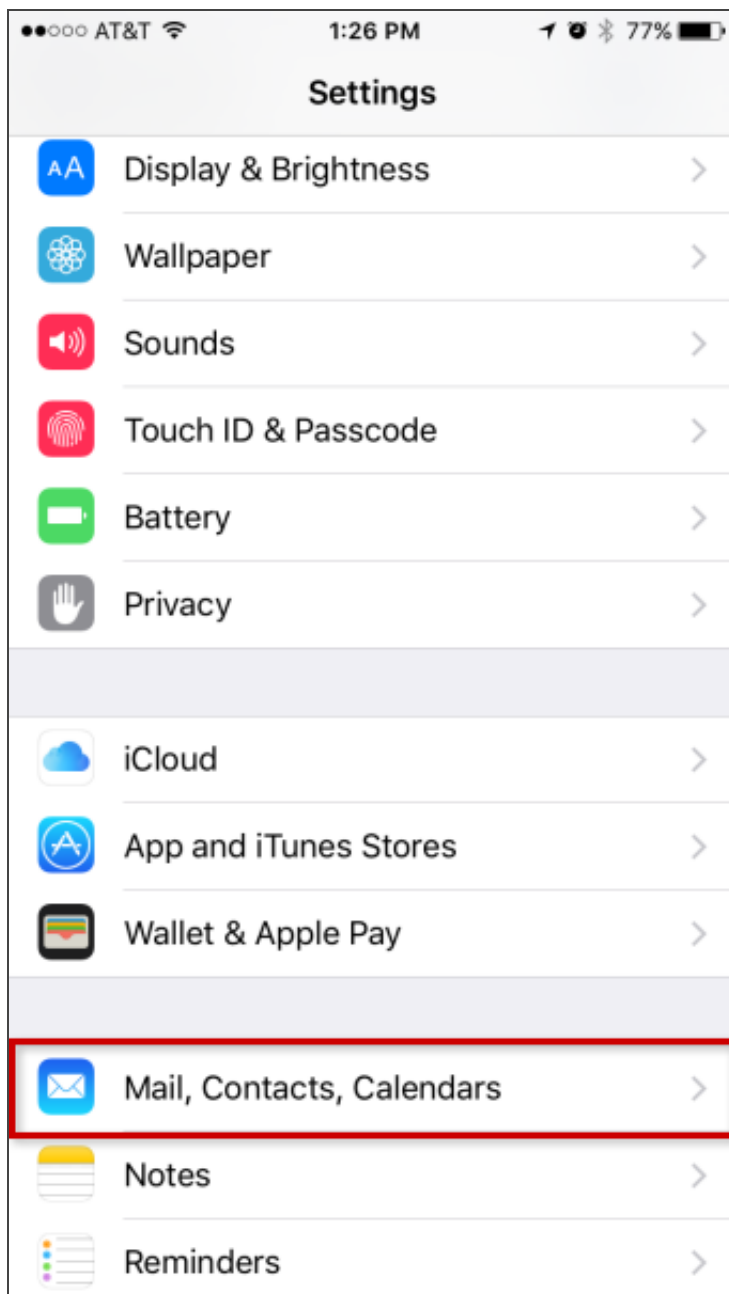

Find and click **Settings** on your iDevice.

*iPhone home screen*

## **Step 2**

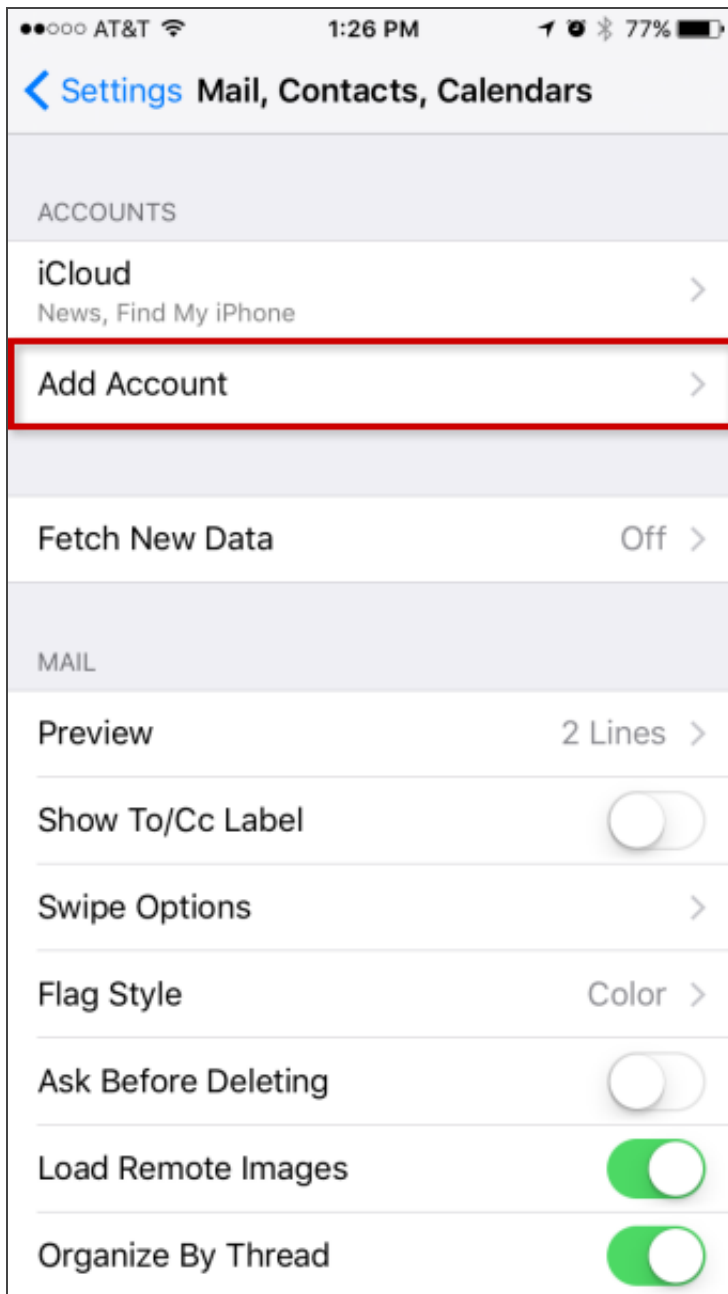

Scroll down and select **Mail, Contacts, Calendars.**

*Settings menu*

### **Step 3**

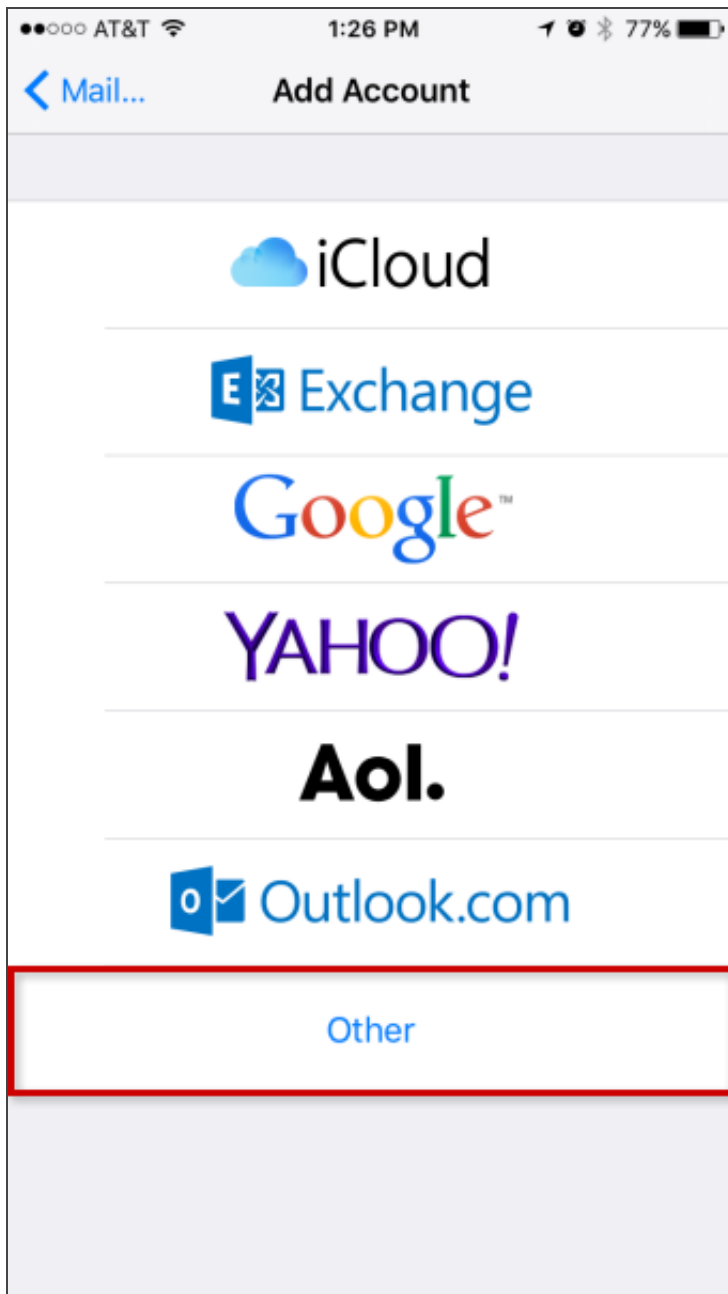

Select **Add Account...**

*Mail, Contacts, Calendars screen*

#### **Step 4**

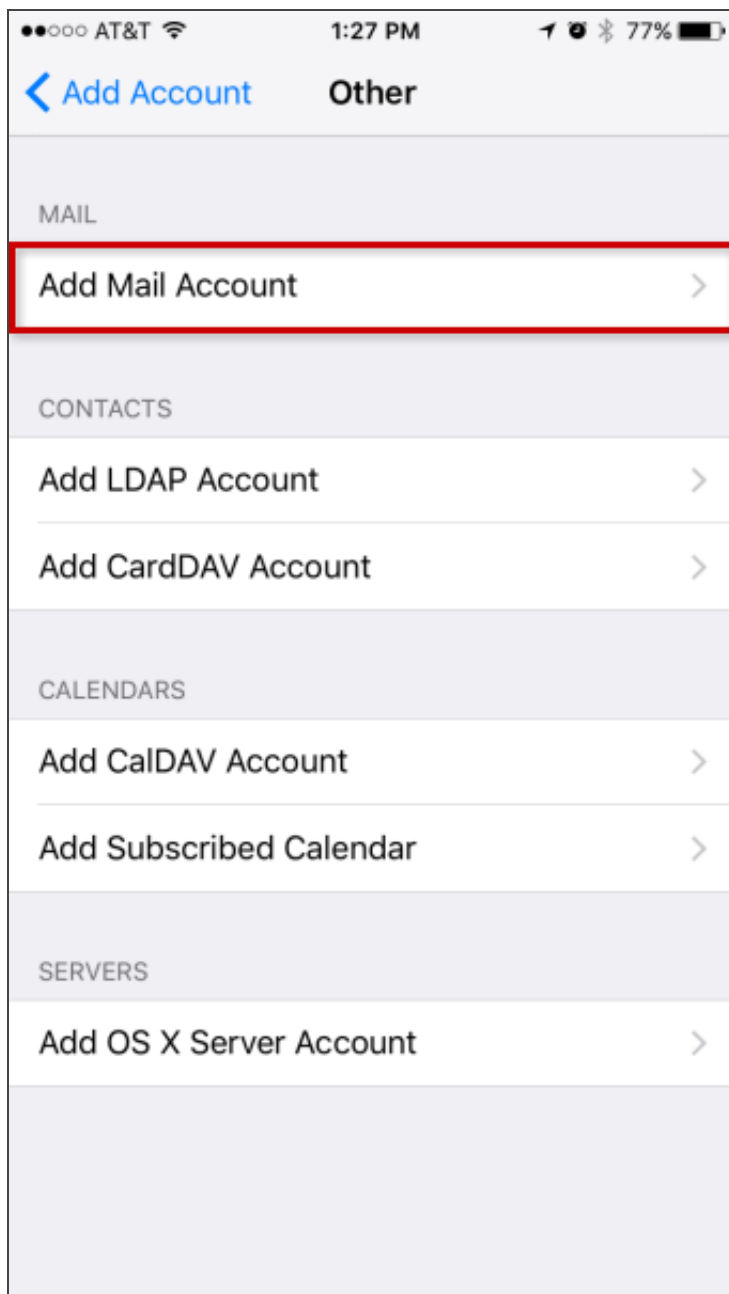

Scroll down and select **Other**.

*Add account screen*

**Step 5**

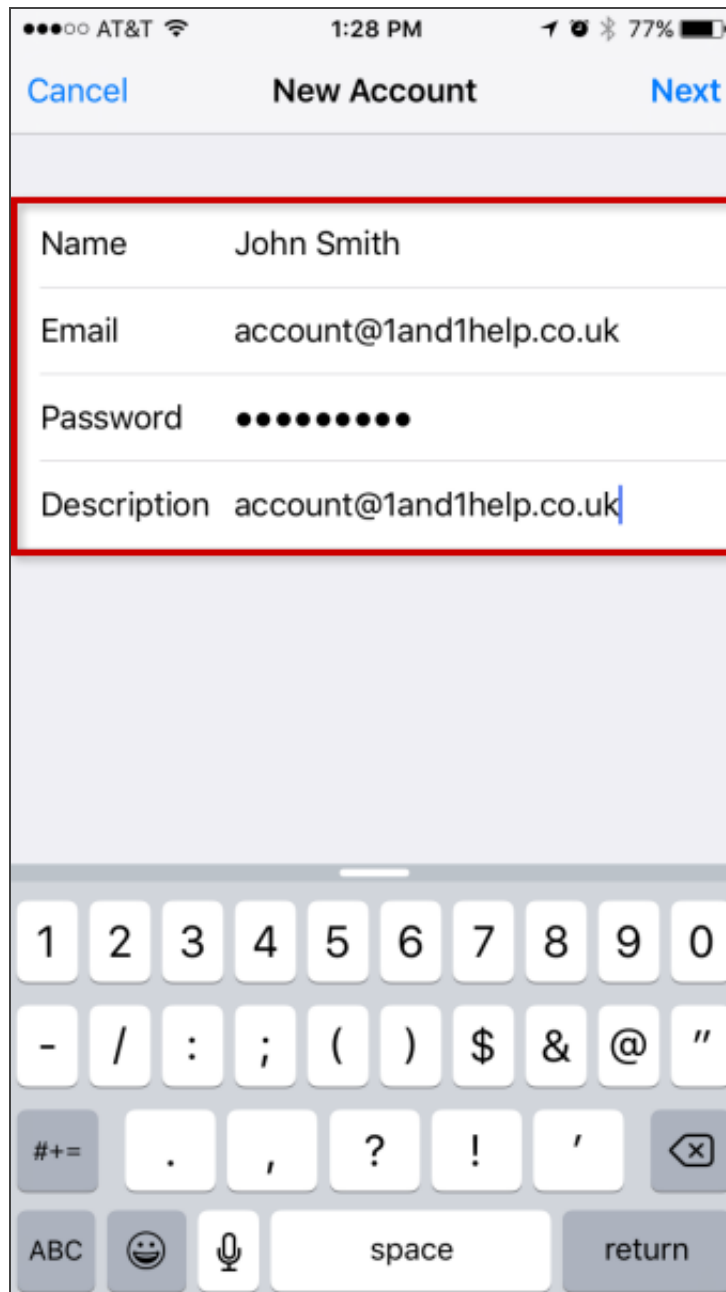

Select **Add Mail Account**.

*Other mail account screen*

## Step 6

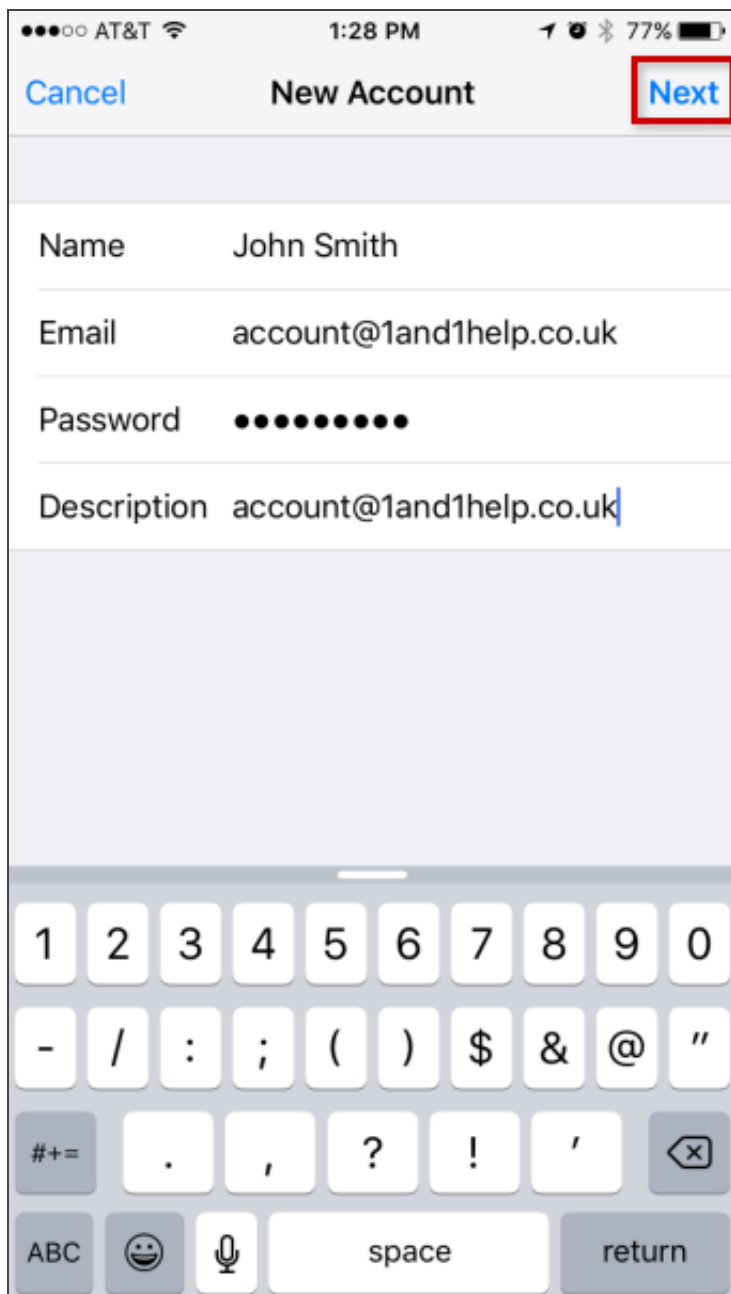

Enter the **Name** you wish to display to others when sending an E-mail, your **full E-mail Address** and the **Password** for the E-mail account. The description will mirror the E-mail Address by default,

although you may change it.  
*New account screen*

### Step 7

Tap the **Next** button.

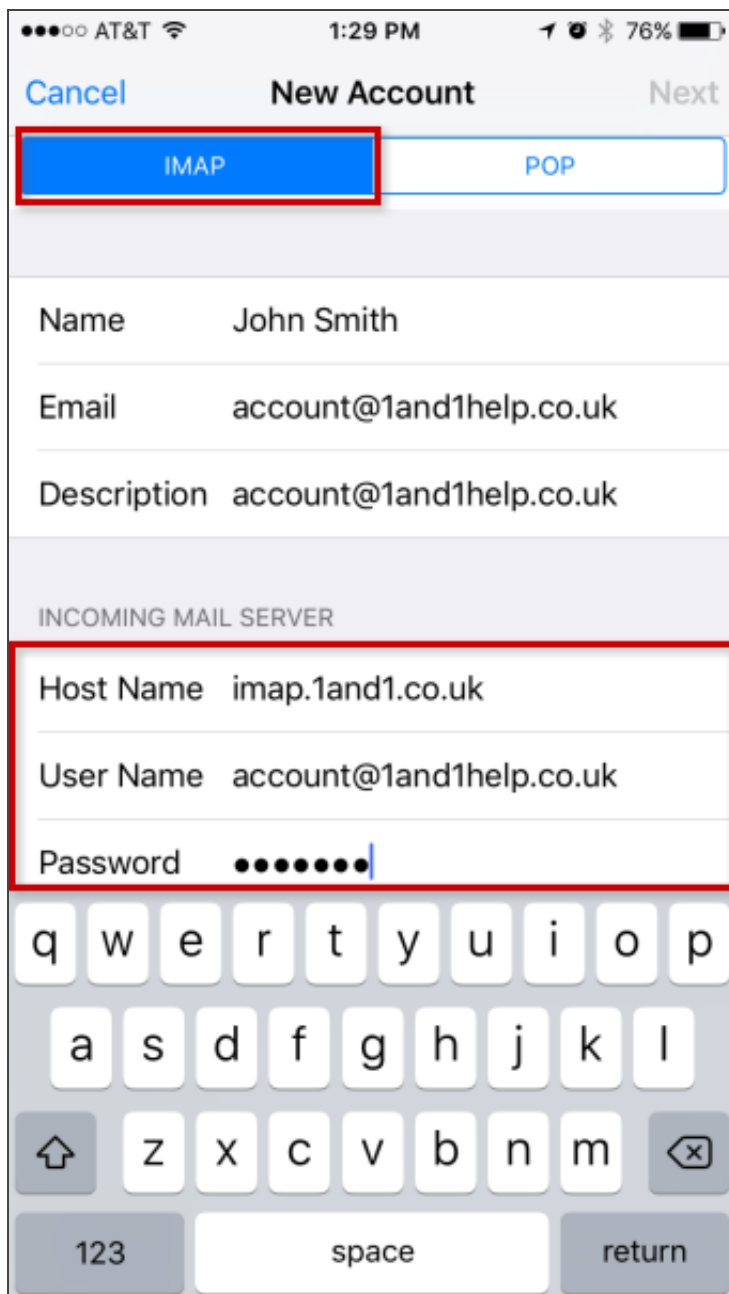

*New account screen*

### **Step 8**

Ensure that **IMAP** is selected at the top and that the name, address and description have been carried over.

Scroll down and enter **imap.1and1.co.uk** in the Host Name field and your **full E-mail Address** in the User Name field under the Incoming Mail Server section.

*New account screen*

### Step 9

Enter **auth.smtp.1and1.co.uk** without the quotes in the Host Name field and your **full E-mail address** in the User Name field under the Outgoing Mail Server section. Enter the **Password** for the E-mail account.
