

Set Up E-Mail Clients Using IMAP or POP3

Please note:

1&1 suggests using IMAP over POP3 because IMAP keeps the original E-mails stored on the mail server, allowing you to access the same account from multiple locations

The Account Name/User Name is your full 1&1 Mail Basic address. You created the **Password** during your E-mail account setup.

Setting	IMAP	POP3
Incoming Server	imap.1and1.co.uk	pop.1and1.co.uk
Port with SSL enabled	993	995
Outgoing Server (SMTP)	auth.smtp.1and1.co.uk	auth.smtp.1and1.co.uk
Outgoing port with TLS enabled	587	587
Outgoing server requires authentication (user name and password)?	Yes	Yes
