

Set Up E-Mail Clients Using IMAP or POP3

Please note:

IONOS suggests using IMAP over POP3 because IMAP keeps the original E-mails stored on the mail server, allowing you to access the same account from multiple locations

The Account Name/User Name is your full IONOS Mail Basic address.
You created the **Password** during your E-mail account setup.

| Setting | IMAP | POP3 |
|---|------------------|------------------|
| Incoming Server | imap.ionos.co.uk | pop.ionos.co.uk |
| Port with SSL enabled | 993 | 995 |
| Outgoing Server (SMTP) | smtp.ionos.co.uk | smtp.ionos.co.uk |
| Outgoing port with TLS enabled | 587 | 587 |
| Outgoing server requires authentication (user name and password)? | Yes | Yes |
